Main RRI keys in Kune Vaini

Citizen science activities on the participative assessment methods for the ecosystem services in the Kune-Vain ecosystem

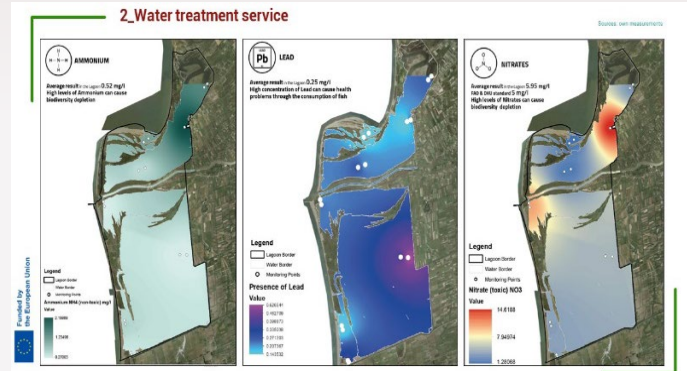

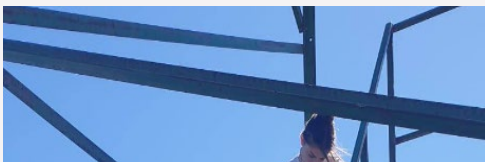

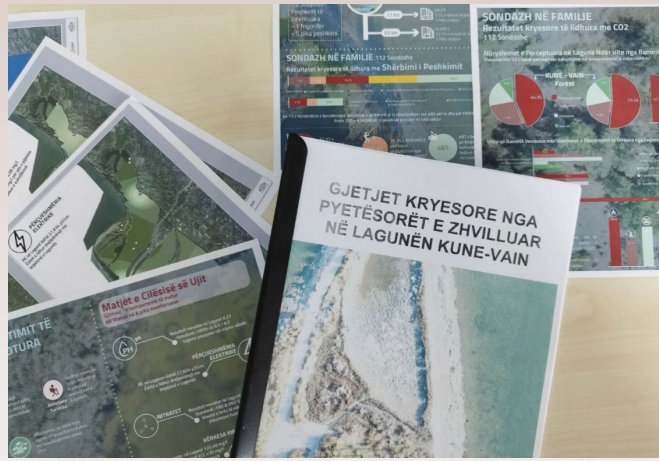

Present and Future impact in Kune Vaini

Current impact of the activities – key achievements and challenges

- *First ecosystem service assessment implemented for a protected area*
- *200+ local stakeholders gained knowledge on the climate and anthropocentric challenges faced by the ecosystem they live in*
- *An open knowledge platform designed and managed by RAPA*
- *Citizen science promoted in governance and academic milieus*
- *Challenge addressed: difficulty in gaining trust by local communities, when synergizing with national governance institutions*
- *Challenge addressed: improved science communication with local households*

Expected future impact of the activities

- *The new management plan of Kune-Vaini designed based on WBC-RRI.net results*
- *Similar citizen science methodologies to be applied in similar contexts (Prespa lake)*
- *Furthered collaboration between CSO-s, governance institutions and HEI-s in issues pertaining to environmental / climate resilience*
- *Support the Kune Vaini lagoon by implementing further ES assessments in the mid-term period*
- *More opened, transparent and collaborative governance institutions*

Thank you for your attention!
