POLICY SUPPORT FACILITY (PSF) CHALLENGE – MUTUAL LEARNING EXERCISE (MLE)

This MLE will serve as a platform to discuss specific needs and interests of participating countries, exchange experiences and knowledge about success factors and lessons learned and provide guidance to policy makers on how to develop or update their industrial technology roadmaps and sector-specific strategies for industrial decarbonisation. The MLE will provide best practices and models for mobilising R&I investments in low-carbon technologies in energy-intensive industries and their deployment, taking into account also framework conditions. The MLE will help to effectively address the challenges of reducing carbon emissions and link R&I on industrial decarbonisation to National Climate and Energy Plans and the new REPowerEU chapters in Recovery and Resilience Plans of Member States.

The MLE will be structured along the following topics:

- **Topic 1**: Introduction and overview of national decarbonisation strategies, roadmaps and programmes.
- **Topic 2**: Policies, design and financing for R&I investments in development, uptake and deployment of low-carbon technologies.
- **Topic 3**: Actors' engagement.
- **Topic 4**: Regulatory and non-regulatory framework conditions.
