Public Call for Applications for Training on the Implementation of Circular Economy Principles in Montenegro

The Science and Technology Park of Montenegro is organizing a training program on the implementation of circular economy principles in Montenegro through four thematic workshops:

1. CBAM & ESG Compliance Workshop: From Carbon Footprint Calculation to Sustainable Business Strategy 16-17.09.2025
2. Circular Solutions in Action: Capacity Building for Public Sector and Civil Society 18-19.09.2025.
3. Closing the Loop in Tourism: Circular Economy Approaches 30.09-01.10.2025.
4. Circular Agriculture: Closing the Loop from Farm to Market 02-03.10.2025.

The workshops will be held in the **“MVP” Congress Hall** at the Science and Technology Park of Montenegro building in Podgorica.

The training is intended for researchers from public and private universities in Montenegro, decision-makers, representatives of the business sector (companies, business associations, cluster associations, etc.), as well as representatives of public institutions and civil society organizations. The workshops aim to strengthen the capacities of public and private sector representatives, decision-makers, and civil society organizations through practical training and experience exchange in areas critical for the transition to a sustainable society and economy.

The Science and Technology Park of Montenegro is organizing this training as part of the project **“R&I POLICY making, implementation AND Support in the WEsteRn BalkanS”** (POLICY ANSWERS), which is funded by the **European Union** under the **Horizon Europe** research and innovation program.

Main Objective of the Training

The main objective of the training is to enhance the knowledge and practical skills of various actors—from the public sector and civil society to the private sector—through four specialized workshops: CBAM and ESG compliance, practical circular solutions, sustainable tourism, and circular agriculture. Participants will gain concrete guidance for improving circularity in their organizations through practical exercises, individual and group work, and consultations with the instructor.

Additionally, participants from Montenegro will have the opportunity not only to acquire knowledge about best practices for transitioning to a circular economy but also to network with potential partners within the country, further promoting collaboration and exchange of experiences.

About the Trainer

The instructor for the training is **Hamdija Mujezin**, an expert in energy, circular economy, and business development, and the Executive Director of **Remote d.o.o. Sarajevo**, Bosnia and Herzegovina. Hamdija holds a master's degree in mechanical engineering from the University of Sarajevo and has ten years of experience as a project manager at UNDP. He is also a key expert for various local and international organizations and companies in the field of circular economy. Throughout his career, he has led the development and implementation of over 50 projects, focusing on establishing financial mechanisms, strategic and regulatory frameworks, building capacities of market actors, and preparing and implementing infrastructure projects. His work aims to create and develop a sustainable and enabling environment for the transition to a circular economy and low-carbon development, for institutions, SMEs, and citizens in the Western Balkans region.

Application

Procedure

The training is designed for 10-15 participants per workshop. Participants will be selected based on prior experience and demonstrated motivation for attending the workshop(s). The training will be conducted in the local language. Participation is free of charge.

Interested candidates can apply via this [electronic form](#) and select one or more workshops.
