INFORMATION FOR AUTHORS

We invite authors to submit topic proposals with abstracts and keywords through the Application for electronic submission of papers at www.bslz.org. Authors can submit papers and poster presentations. Accepted papers and poster abstracts will be published in the Proceedings, if additional conditions are met: only papers and abstracts will be published where at least one of the authors has paid the registration fee and which will be presented at the Conference (orally or as a poster presentation). The decision on the acceptance of the paper and the method of presentation at the Conference is made by the Scientific Program Committee, based on positive reviews (there is a possibility that during the review process the authors of the paper may be directed to a poster presentation instead of publishing the paper). One author can be on a maximum of three papers or posters, of which as the first author on a maximum of two papers or posters. Exceptionally, the Academic Program Board may approve a deviation from this rule. The topic is reported by one of the authors (corresponding author) who has an open and verified account at www.bslz.org.

Student papers are those in which all authors are students at any level of study. The organizer awards the three best/prized student works that received a positive review. For one author per awarded work (the one who exhibits), the Organizer will bear the cost of the registration fee, excluding accommodation.
